# Validation while adding plan

If he's already a user and adding a plan, only after his plan ends the new plan should start

The starting date should take date.now or the end date of previous plan

The plans are in card format, so when a new plan is added, it will come as card format on the front end

# When pressed recharge, link to this page

**Pay using credit card**

Pay now

**Pay using Debit card**

Pay now

**Pay using UPI**

Pay now

There is no gate way, when pressed pay now redirect to Account Overview page and give an alert saying payment sucessful

Cancel  
Payment

## ChatBot

Just css this page, we will do the backend part

We are taking predefined questions, asking them to select which is fetched from the db, and if they chose other, we are asking them to type the query and that creates a ticket with content what the user entered
